## Roll and Read

You Will Need: One 6-sided die (1 player mode) and a friend (2 player mode).  
Look for the "y" and "ou" sounds from the book – and watch out for some sneaky tricky words!

1 player: Roll the die. Choose a word from the row for that number and read it aloud. If you read it correctly, color it in. How many squares can you color?

2 players: Each player uses a different color. Take turns to roll the die and read a word as before. The player with the most colored squares at the end is the winner.
